The fractal lognormal percentage theory can be thought of as a generalization of the 20/80 law using the lognormal distribution. The 20/80 law is a heuristic law that has evolved over the years into the following rule of thumb for many populations: 20% of the population accounts for.

Fractal Fluctuations and Statistical Normal Distribution The assumptions underlying the normal distribution such as fixed mean and standard deviation, independence of data, are not valid for real world fractal data sets exhibiting a scale-free power law distribution with fat tails.
